Subject: RE: Bit report

Hi Adrian, good news, worked along this morning, just the bit with no noseband. They ran along 600m going 15sec, 14.2sec, and 12.5the last 200m. The best she has been so far. No cough or gasping and keen to go on.

She used to be a bad displacer as she has small epiglottis and she would cough and gurgle when she was pulling up.

Hoping she keeps on the improve.

Christine
